

**Instructions:** Only ordinary calculators are allowed.

**Question 1. [ 10 marks ]** Evaluate the following limits:

$$\begin{array}{ll}
 (i) \lim_{x \rightarrow 0} \frac{x}{\sqrt{x+3} - \sqrt{3}} & (ii) \lim_{x \rightarrow 2} \frac{|x-2|}{x-2} \\
 (iii) \lim_{x \rightarrow -\infty} \frac{-x}{\sqrt{x^2 + 1}} & (iv) \lim_{x \rightarrow \infty} \frac{\cos x}{x^2} \\
 (v) \lim_{x \rightarrow 0} \frac{\sin 2x \cdot \cos 3x}{x} &
 \end{array}$$

**Question 2. [ 3 marks ]** Find the values of  $a$  and  $b$  in order to the following function be continuous:

$$f(x) = \begin{cases} \frac{2 \sin(3x)}{x}, & \text{if } x < 0 \\ b + 1, & \text{if } x = 0 \\ a \cos(2x) - 1, & \text{if } x > 0 \end{cases}$$

**Question 3. [ 3 marks ]** Find the vertical and horizontal asymptotes for:

$$f(x) = \frac{4 - x^2}{x^2 - 9}.$$

**Question 4. [ 4 marks ]**

- (a) Use the formal definition of the limit to prove that  $\lim_{x \rightarrow 1}(5x - 1) = 4$ .
- (b) Use the definition of the derivative to find  $f'(x)$  if  $f(x) = x^2 + 3$ .
